

# 2 in 1 SOLAR POWERED LIGHT

## HOW YOUR SOLAR POWERED LIGHT WORKS

- During the day, the solar panel converts sunlight into electrical energy and stores it in the built-in rechargeable battery.
- At night, the stored energy powers the light, which can be used to illuminate your garden, walkway, or patio.
- The light is completely weather-resistant and can be used in any weather.
- You don't need to plug the light into an outlet or replace batteries.
- The light is easy to install and can be used in any location.

## CHOOSING A LOCATION

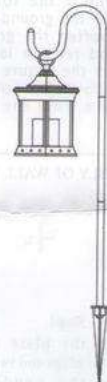

- Choose a location that receives plenty of sunlight during the day.
- Avoid locations that are shaded by trees or buildings.
- The light should be placed in a location that is easily visible at night.
- The light should be placed in a location that is safe from vandalism.
- The light should be placed in a location that is easy to access.

## FIRST TIME USE

- Do not plug the light into an outlet.
- The light will automatically turn on at dusk and off at dawn.
